

Dullahan

1. Log on as Dullahan
2. Run the shortcut labelled 'Dullahan'
3. Open program_v6 from C:/Andor/Current/Programs
4. Select Acquire > Acquire Image > Real time > 0.2 sec exposure to focus camera
5. Open a command prompt and type 'ICBurstWrite (41,6,255)' to turn on the lights
6. Run program and follow prompts. Typically run for 2 hours between images, 10min wait, 20min exposure
